

Dmytro Lanovyi

FULL-STACK DEVELOPER

TypeScript · React · Next.js · Node.js · Fastify · PostgreSQL

lanovui0902@gmail.com Telegram: @A0klgahara aokigahara.dev github.com/BlackMfgik linkedin.com/in/dmytro-lanovyi

Cherkasy, Ukraine · Remote

Full-stack developer working with TypeScript, React, Next.js, Node.js and PostgreSQL. Writing code since 2024 and delivering commercial projects for clients since 2025 — from database schema and REST API to UI, authentication, payments, tests and deployment. Looking for a full-time role in a team where I can grow as an engineer; also open to freelance projects.

EXPERIENCE

Freelance Full-Stack Developer

2025 — present · Remote

Okrip World — client: Ukrainian Minecraft network (3 servers), 2026

LIVE code on request

- Built the website and a player verification system: Discord login → application with Minecraft nickname → moderation in Telegram → automatic whitelist on the game server.
- Designed a Turborepo monorepo: Next.js frontend, Fastify API with a background worker, shared Zod contracts, PostgreSQL + Drizzle.
- Wrote a Java 21 Paper/Purpur plugin with reliable command delivery (retries) between the API and the game server.
- Set up CI on GitHub Actions (typecheck, lint, Vitest tests on real PostgreSQL 17, build) and Docker Compose for local PostgreSQL.
- Integrated live Dynmap world maps through a server-side proxy.

Next.js · Fastify · PostgreSQL · Drizzle · Discord OAuth · Telegram Bot API · Java · Vitest · Docker · GitHub Actions

Come By Shop — client: food ordering platform, 2025

LIVE code on request

- Delivered a full food e-commerce product end to end: menu, combos, cart, user accounts and an admin panel.
- Implemented email verification, Google OAuth, 2FA, WayForPay online payments, SMS/email notifications and Cloudinary image uploads.
- Built the Fastify REST API with PostgreSQL + Drizzle ORM: request validation, rate limiting and security headers.
- Covered frontend and backend with Vitest tests; deployed on Railway.

React · Next.js · Fastify · Drizzle ORM · JWT / OAuth · WayForPay · Vitest

PERSONAL PROJECT

Nami Gear — e-commerce store for gaming mousepads, 2026

LIVE CODE

- Product catalog, cart and checkout on Next.js 16; product and stock data in Neon PostgreSQL, synced with TanStack Query.
- Persistent cart with Zustand, images on Cloudinary, orders stored via Next.js Route Handlers.

Next.js 16 · TypeScript · Neon PostgreSQL · Zustand · TanStack Query

TECHNICAL SKILLS

LANGUAGES	TypeScript, JavaScript, SQL, HTML, CSS
FRONTEND	React 19, Next.js (App Router, SSR), Tailwind CSS, Zustand, TanStack Query
BACKEND & DATA	Node.js, Fastify, REST APIs, PostgreSQL, Drizzle ORM, Zod
AUTH & INTEGRATIONS	JWT, NextAuth, Google / Discord OAuth, 2FA, WayForPay, Cloudinary, Resend, Telegram Bot API
QUALITY & DELIVERY	Vitest, ESLint, Git, Docker / Docker Compose, GitHub Actions (CI), Turborepo, Vercel, Railway

EDUCATION

Self-directed software development 2024 — present

MDN, React and TypeScript documentation; practical project work.

LANGUAGES

Ukrainian — native

English — B1–B2
